To whom it may concern,

JR Construction has completed 2 projects for our family...a master bath and a basement guest room/storage area. We've been very happy with both projects!

From the start, Jerry worked with us to understand our goals and overall budget. He helped us evaluate options and select the ideal materials. His team of subcontractors is top-notch. We feel comfortable with these professionals in our home and their follow-up on open items has been great.

We have more projects in store and look forward to including JR Construction in these plans.
